## Activity Card – Create music!

Find a sample of musical artwork that engages you from the gallery.

**Listen!** What sounds do you recognize? What did the artist/composer include in their artwork? What is the artist/composer/performer communicating about climate change? (Consider the artist statement too) Do you hear any similarities to other music? What is different about this piece of music? How did the music make you feel?

**Imitate** the feeling, or idea that the artist/performer/composer is trying to communicate. (Record yourself if you want to observe your performance)

**Create** your own musical performance to communicate your message or idea about climate change. Consider some of these in your creation tempo, timbre, dynamics, beat and rhythm, melody, harmony, texture.
